   The first section of our interview focuses on education in Michigan.

   Students are often given the grades, A, B, C, D, and F as well as a plus or
   minus to indicate the quality of their work. Suppose the public schools in
   Michigan were graded in the same way. What grade would you give the
   state's public schools?

     Next, I would like to read you some statements about education in Michigan
     and have you tell me to what extent you agree or disagree with each.

     (The first is) Increasing choice and competition, through the establishment
     of charter schools and vouchers, will lead to improvements in the
     performance of public schools.

     Would you say you strongly agree, somewhat agree, somewhat disagree, or

Now I'm going to ask you some questions about students who break rules or
commit crimes at school. Michigan law states that for some offenses school
officials must expel students for 180 days, or an entire school year. For
other offenses, school officials may suspend a student, that is, not let him
attend school for a shorter period of time. For still other offenses, school
officials may give the student some other lesser punishment such
as detention, or have him see a counselor.

What action do you think is appropriate for students who have a weapon in
school?

Would you say expelled for a year, suspended, a lesser form of punishment,
counseling, or do you think no action should be taken?

RI@a

        In a couple of months, we'd like to re-contact some of the people we've
        spoken with for a short 5 or 6 minute interview. Would you be willing
        to participate again in a couple of months if it would only take 5 or
        6 minutes?
