B1   Budget Version I

As you may know the state budget in Michigan is in deficit.

Of all the things that the state could do to address the budget deficit,
which one of the following should the state government do first?

Reduce medicaid spending, reduce revenue sharing to local governments, reduce
aid to local schools, reduce aid to colleges, or reduce prison spending by
releasing prisoners early?

USE THESE DEFINITIONS: Revenue sharing to local governments is giving state tax
dollars to local governments to support police and fire protection, street
and road maintenance, and other services such as parks, recreation and
administration. Medicaid is health care for low income and needy people

ec12a   Likely Use State Websites

As you may know, on state of Michigan websites you can do many
transactions, such as renewing your driver's license, purchasing hunting
and fishing licenses, making reservations at campgrounds and parks,
getting information about health and safety, and preparing your state income
tax forms.

Next time you need to complete a state government transaction, how
likely is it that you would do it via the web?

Would you say you would be very likely, somewhat likely, not very likely,
or not likely at all?

lu1   Concern Local Sprawl

        Next, I have a few questions about land use in Michigan. Land use refers to
        the use of land for purposes such as residential, commercial, industrial,
        agriculture, and recreation.

        One land use issue is that of urban sprawl. Urban sprawl is the process of
        residential and commercial development spreading out into undeveloped areas
        or agricultural areas.

        How concerned are you about urban sprawl in the county or region in which
        you live?

inca $35,000 or More

        To get a picture of people's financial situations, we'd like to know the
        general range of incomes of all households we interview. This is
        for statistical analysis purposes and your answers will be kept strictly
        confidential. Now, thinking about your household's total annual
        income from all sources (including your job), did your household receive
        $30,000 or more in 2002?
