        Next I am going to read two statements. Please tell me which one you agree
        with most.

        The first is, in order to curb terrorism in this country, it will be
        necessary to give up some civil liberties.   -or-

        We should preserve our freedoms above all, even if there remains some
        risk of terrorism.

dg1   Comfort - Central Database

        Next, I have some questions about the privacy of personal information.

        The state of Michigan collects personal information from residents when
        they do such things as register a car, apply for a marriage or
        fishing license, or file their taxes.

        Linking together the data collected by different state government agencies
        can make state government more efficient. All citizen information
        could be combined into one database, creating a complete data picture of
        the individual that could be easily accessed by any state government agency.

        Would you be very comfortable, somewhat comfortable, somewhat uncomfortable,
        or very uncomfortable with the state creating such a database?

dg5   Privacy Standards

The federal government has asked private businesses to voluntarily follow
guidelines for the use of customer information. The guidelines
recommend that companies notify customers about what information is
collected, how it will be used and shared, and how it will be protected from
unauthorized use. They must also obtain customer consent to use their
information.

EC1   Electoral College

    Suppose that after all the votes have been counted in November, George
    Bush and John Kerry have the same number of electoral votes. This is
    unlikely, but it could happen. The U.S. House of Representatives would
    then choose the President.

    In your opinion, which one of the following three methods should the
    House use to choose the President?

    Each Representative should vote for the candidate who has the largest
    number of popular votes;

    Each Representative should vote for the candidate from his or her
    own political party;   or
