ow1   Overweight Issue

        Next I have a question about a health issue.

        Some people believe that being overweight is a public health concern that
        should be addressed by society as a whole. Others believe that being
        overweight is a personal concern and is only the business of the
        individuals involved. Which of these views comes closest to your own
