D10   Trust govt. in Washington

          People have different ideas about how much they can trust
          government to do what is right. These ideas don't refer to
          Democrats or Republicans in particular, but just to the
          government in general. We want to see how you feel about
          this for each of the levels of government.

          How much of the time do you think you can trust the government
          in Washington to do what is right -- nearly always or
          most of the time, some of the time, seldom, or almost never?

       PCT   N VALUE   LABEL
      14.5 136   1 NEARLY ALWAYS OR MOST OF THE TIME

P1a   Prisons how much

        Now I have several questions about how state tax monies are
        distributed among government programs.
        Imagine that you're in charge of dividing the money and that
        you have 100 dollars to spend. How would you distribute the 100
        dollars of Michigan taxpayer money among the following seven
        categories: First: prisons or corrections, Second: primary and
        secondary education (or K-12 education), Third: higher education
        (the colleges and universities), Fourth: health, Fifth: the
        environment and natural resources, Sixth: social services and
        welfare, and Seventh: everything else.

        Let's start with Prisons or corrections. How much of the 100
        dollars would you spend on this set of programs and services?

EN1   info on environmental decline

          Next, I'm going to read you a list of environmental
          problems that scientists and experts say affect Michigan to some
          extent. We'd like to know how much information has gotten out
          to the public about each one. While some Michigan residents
          may have heard quite a lot about some of these problems, some residents
          may have heard almost nothing about some of the others.

          Regardless how serious a problem you think each one is, I'd
          like you to tell me whether you'd say you have heard a lot, a fair
          amount, only a little, or almost nothing at all about each problem.
          Let's start.

          The decline in the quality of the environment in urban areas.

          Would you say you have heard a lot about this, a fair amount, only a
          little, or almost nothing?

EP1   Taxes to reduce energy consumtion

      Next I'd like to ask you how much you have heard about
      public policies related to the environment.

      Many different public policies have been proposed
      to address environmental problems. I'm going to read you
      a list of policies that are being tried in other countries
      and states. While some Michigan residents may have heard quite
      a lot about some of these, some residents may have heard almost nothing
      at all about some of the others. As I mention each
      policy, please tell me if you'd say you have heard a lot about it,
      a fair amount, only a little, or have you heard almost nothing at all
      about it.

      The public policy of increasing taxes on gasoline, electricity,
      and natural gas to encourage businesses and homeowners to reduce
      their energy consumption.

      Would you save you have heard a lot about this, a fair amount,
      only a little, or almost nothing?

P8   Fixed vs variable sentencing

I have a couple of questions about the punishments given
to people who commit crimes. Some people think that there
should be a fixed sentence for every crime, with the most
serious crimes having the most serious fixed sentences.
Other
people think that the length of sentences should take into
account other factors as well, such as the circumstances
surrounding the crime.

In general, do you favor fixed sentences for every crime or
do you favor some flexibility so that judges can take other
factors into account when deciding on sentences?

```

E7   Size of deficit

          The size of the annual federal budget deficit was a major issue
          in the 1992 presidential campaign. As you probably know the
          federal deficit is the amount by which federal spending exceeds
          the money raised through taxes in a single year. This is
different
          from the federal debt, which is the total of all of the
deficits
          that have occurred through the years.

          Now, thinking about the annual budget deficit, how do you think
the
          size of it has changed since President Clinton took office? Has
there
          been a large increase in the annual deficit, a small
          increase, has it stayed about the same, has there been a
          small decrease in the deficit, or has there been a
          large decrease?

```

EL13   Flat tax-Armey

The Republican leader of the U.S. House of Representatives,
Dick
Armey, has proposed to replace the current federal
income tax with a flat tax. Under this plan, everybody
would pay the same tax rate regardless how much they earn
that is, if they earned over some minimum amount.
Furthermore
all deductions would be eliminated, including those for
interest
payments on home mortgages and contributions to charities.

How strongly do you favor or oppose this plan for a flat
income tax
to replace the progressive income tax -- would
you say you strongly favor, somewhat favor, somewhat oppose,
or
strongly oppose the flat tax plan?

```

ED12   On-campus funding

          Now, please think about how state tax money is distributed
          to educational services beyond high school. Imagine that
          you're in charge of dividing the money and that you have
          100 dollars to spend. How would you distribute the 100
          dollars of Michigan taxpayer money among the following three
          services: First, teaching students on-campus, Second, providing
          off-campus education and technical help, and Third, doing
          research.

          Let's start with "Teaching Students On-Campus."

          How much of the 100 dollars would you spend on this service?

INC1   Income greater than $30,000

          To get a picture of people's financial situations, we'd
          like to know the general range of incomes of all
          households we interview. This is for statistical analysis
          purposes and your answers will be kept strictly
          confidential. Now, thinking about your household's total
          annual income from all sources (including your job), did
          your household receive $30,000 or more in 1995?

     PCT   N VALUE LABEL
